booths

Freedom to be loud

Your music and voice sound better in a Studiobricks

- Rock around the world without disturbing your neighbour
- Save time and space to set up your recording space
- Your acoustic space with patented soundproofing technology isolating an average of:

Double walled booths
Up to -49,8 dB
(at 3150 Hz)

Triple walled booths
Up to -62,4 dB
(at 3150 Hz)

One series

The **One series** are individual soundproof booths with -45 dB of acoustic isolation, ideal for musical practice and professional recording. They provide an immersive experience and guarantee high-quality results.

Choose the size that fits you best!

One

138 x 106 x 226 cm
4.5 x 3.5 x 7.4 ft

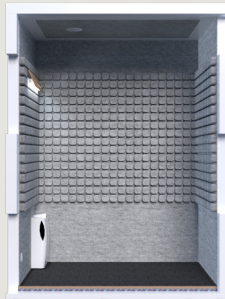

Compact single booth designed for home use with dimensions suitable for any space.

The Studiobricks One is the best-selling booth, designed for broadcasters, voice actors, and musicians, making it an excellent choice for small instrument rehearsals. Also great for singing schools.

One Plus

168 x 106 x 226 cm
5.5 x 3.5 x 7.4 ft

Single booth with more space to move around. The **Studiobricks One Plus** is ideal for recording professionals and musicians who require regular rehearsal. The perfect booth designed for music schools accommodating a range of medium-sized instruments with perfection.

One XXL

198 x 121 x 226 cm
6.5 x 3.9 x 7.4 ft

Even more space for professional audio production and musical practice. The **Studiobricks One XXL** is an exemplary daily workspace, ideally suited for musicians with medium to large instruments. It's also perfectly designed for duo recording sessions.

V.O. Edition

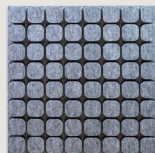

The Voice Over Edition is a **kit of accessories** specially chosen **for professional recording**. The Voice Over Edition is **highly appreciated** by voice-over and dubbing professionals around the world. This kit is applicable to any Studiobricks booths.

G-SOUND KIT

Do you need to turn your room into a professional studio?

Absorption kit for professionals available in sizes S, M, and L. Choose the size that best fits your space!

15 years of unwavering passion

1. Passion for the saxophon

Guillermo, CEO of Studiobricks, was in search of a rehearsal space with optimal acoustics in his Barcelona apartment that wouldn't disturb neighbors. Frustrated with the lack of quality booths in the market, a team of acoustic experts, engineers, architects, and carpenters joined forces to tackle Guillermo's challenge.

2. The birth of Studiobricks' first booth

After numerous tests and prototypes, the legendary Studiobricks booth was born in November 2008. A unique booth in the market with a modular design of manageable pieces without the need for screws, all thanks to the patented system we call BRICK.

3. The magic of BRICK

The versatility and quality of Studiobricks are thanks to the BRICK patent, providing the possibility for the booths to be assembled and disassembled effortlessly without compromising their isolation quality. Each BRICK serves a dual purpose as an isolated wall piece and a sound-absorbing cladding, ensuring optimal interior acoustic performance.

4. Global power of silence

Headquartered and with a factory in Barcelona, Studiobricks expands its commercial network worldwide with its minority partner Laurent Decroix. Following the sale of a booth to Dave Gahan, a member of the Depeche Mode group, sales in the United States skyrocketed. In 2015, Miguel Donoso-Cortés founded Studiobricks USA Inc. to further expand from New York. Currently, Studiobricks ships booths to 49 countries around the globe.

5. Versatile soundproofing solution

In late 2018, Studiobricks received a request to manufacture over 5,000 booths for calls for the multinational company WeWork Coworking Spaces. This milestone marked the beginning of Studiobricks Office Solutions, providing booths for offices that enhance productivity. Our quality and 45 dB soundproofing open doors to other sectors, offering booths for isolating noisy machinery, event booths, and even sleep cabins.

6. The uninterrupted creative haven

Our materials deliver exceptional performance, offering bidirectional soundproofing from the inside out and outside in. Creating an inspiring sanctuary—a place to concentrate, work, shout, sing—a space where you can create and be yourself. Studiobricks booths have become the go-to tool for top-quality music production and content creation.

7. Sustainable and long-lasting booths

At Studiobricks, we prioritize our planet. We employ recycled materials and environmentally friendly manufacturing processes, reducing the environmental impact of our products. When you choose Studiobricks, you're not only choosing quality but also choosing the planet!

The acoustic
expert offers you
the best solution
for you

At Studiobricks, we specialize in **delivering high-quality acoustic solutions tailored for the dynamic world of music and recording.** Our innovative solutions are designed to cater to a wide range of professionals and enthusiasts within the music and recording industry. Whether you are a musician, a recording studio, a music school, a production company, or a broadcaster we have the perfect acoustic solution to elevate your audio experience. **With Studiobricks, excellence in sound is not just a promise, it's a guarantee.**

A quality, sustainable, portable, and secure booth

We believe **silence is a superpower** for concentration and creation. Our sound isolation booths harness this power, **giving you the freedom** to take your creativity and productivity to the max. Whether you need to record or play music, our booths **provide you with a focused environment, isolated from ambient noise**, neighbors, traffic, or any other distraction.

1. Superior patented acoustic isolation

With the trust of your acoustic expert

Patented double-wall system achieves an average of -45 decibels of isolation, and the triple-wall system achieves an average of -47 decibels of isolation.

2. Easy assembly and disassembly

A flexible investment that moves with you

The magic of the patented BRICK system allows for modular assembly and disassembly in a matter of minutes, all without the need for screws. This means your booth can go wherever the future takes you without compromising its acoustic isolation properties.

3. Customizable

Timeless design that adapts to you

Clean lines, high-quality materials, and finishes enhance your space's ambiance. Studiobricks booths can be customized to your preferences, including booth size (up to 50m²), additional acoustic windows, and booth color.

4. The most sustainable booth on the market

Certified by Ecovadis with the Bronze Medal

- Acoustic absorbers are made from recycled PET.
- Sound isolation system manufactured from upholstery waste.
- We use water-based paint and formaldehyde-free MDF.

5. Safe booths

Beneficial for your health and safety

- Super silent ventilators.
- Our acoustic absorbers contribute to good air quality, unlike the foam commonly used.
- We use fire-resistant materials in compliance with regulations.
- Our booths are earthquake safety certified.
